

PERINATAL MORTALITY

August 2009

By

Dr Rashida Amir

Paeds Department

- Total admissions =
- Total expiries = 52
- expiries of BBH =

Case 01

- B/o Nosheen , NB , B/B , wt 2 kg
- Preterm GA 34+ wks , SVD at BBH to G₂P₁mother
- Mode of admission – ER
- D.O.A – 19-08-09
- Risk Factors
 - * h/o PROM > 18hrs
 - * h/o Previous preterm delivery
 - * preterm labour
- Call not sent, baby sent from LR with nurse

- **On examination**

- Sick-looking , moaning, Hypothermic baby, pallor , depressed NNR , weak cry , **Diagnosis**

- Preterm 34⁺ wks , LBW AGA , Birth asphyxia II, N.N.Sepsis, N.N. Jaundice, Apnea of Prematurity

- **Management**

- O2 inhalation , I/V antibiotics , I/V fluids , dopamine & aminophylline infusion , resuscitation/CPR

- D.O.E 23-08-2009
- Duration of stay in NICU – 4 days

Case 02

- B / o Shamshad , NB , B/B , wt 2.5 kg
- FTP , LSCS at BBH to G4P2A1 mother
- Mode of admission ER
- D.O.A- 27-08-2009
- Risk Factors
 - * placenta praevia II & abruptio placenta
 - * non-booked
- Call not sent. Baby sent from COT with nurse

- **On Examination**

- Sick-looking baby , lethargic , hypothermic, depressed NNR

- **Diagnosis**

- Birth Asphyxia III , N.N.Sepsis

- **Management**

- O2 inhalation , I/V antibiotics , I/V fluids , dopamine transfusion , resuscitation/CPR

- **D.O.E** 28-08-2009

- **Duration of stay** in NICU 16hrs

Case 3

- B/O Shakeela, NB , MC ,Twin 2, wt. 0.9kg
- Preterm, SVD at BBH mode of admission ER
- **D.O.A** 01-08-2009
- Risk Factors

- Call noted by Paeds Depart.
- Baby delivered with APGAR 3/10
- 7/10
- **On Admission**
- Sick-looking baby , lethargic ,moaning
depressed NNR , meconium-stained , pallor
- Diagnosis
- Birth Asphyxia , MAS , N.N.Sepsis

- Management
- Prop-up , O2 inhalation , I/V antibiotics , I/V fluids , infusion dopamine , blood transfusion , resuscitation/CPR , ventilator support
- D.O.E 12-04-2009
- Duration of stay in NICU 34 hrs

Case 4

- b/o Yasmin , NB , MC , wt 2.5kg
- FTP , SVD at BBH
- D.O.A 29-04-2009
- M.O.A ER
- Presenting Complaints
 - * cyanosis
 - * bleeding from the mouth
- Call not sent . Baby sent to ER

- On Admission
- Sick-looking , tachypneic , depressed NNR
- Diagnosis
- N.N.Sepsis , DIC
- Management
- Prop-up , O2 inhalation , I/V antibiotics , I/V fluids , resuscitation/CPR , ventilator support
- D.O.E 30-04-2009
- Duration of stay in NICU 30 hrs

Case 5

- b/o Zoobia , NB , MC , wt 0.9 kg
- Preterm , GA 6.5 months , SVD at BBH
- M.O.A ER
- D.O.A 16-04-2009
- Call not sent
- Baby sent from LR in gasping condition
- On admission
- V.sick-looking , gasping respiration

- Diagnosis
- Prematurity 27 plus wks , Birth Asphyxia , ELBW
- Management
- Resuscitation / CPR , I/V antibiotics , I/V fluids , infusion dopamine , ventilator support
- D.O.E 16-04-2009
- Duration of stay in NICU 01 hr 15min

Case 6

- b/o Gulfam , NB , MC , wt 1.5 kg
- Preterm , GA 30 wks , SVD at BBH
- M.O.A ER
- Risk Factors
 - * pre-eclampsia
- Call noted by Paeds Depart.
- Baby delivered with APGAR 3/10
- 6/10

- On Admission
- Sick-looking , moaning , depressed NNR , clear chest
- Diagnosis
- Prematurity 30 wks , Birth Asphyxia , LBW AGA , septicaemia
- Management
- Prop-up , O2 inhalation , I/V antibiotics , I/V fluids , infusion dopamine , FFP transfusion ,

- 
- 
- Resuscitation/CPR
 - D.O.E 26-04-2009
 - Duration of stay in NICU 03 days

Case 7

- b/o Shazia , NB , MC , wt 1.5 kg
- Preterm ,GA 30 wks ,SVD at BBH to G7P6 mother
- M.O.A ER
- D.O.A 04-04-2009
- Risk Factors
 - * preterm labour
- Call attended by Paeds Depart.

- Baby delivered with APGAR 6/10
- 8/10
- On Admission
- Sick-looking , average NNR , clear chest
- Diagnosis
- Prematurity 30 wks , LBW AGA , N.N.Sepsis , DIC
- Management
- Prop-up , O2 inhalation , I/V antibiotics , I/V fluids , infusion dopamine , blood transfusion

- FFP transfusion , resuscitation/CPR , ventilator support
- D.O.E 09-04-2009
- Duration of stay in NICU 04 days 15 hrs

Case 8

- b/o Farzana , 5th DOL , MC , wt 02 kg
- FTP , SVD at BBH to G4P3 mother
- No perinatal complications
- M.O.A ER
- D.O.A 11-04-2009
- Presenting Complaints
 - * fever
 - *reluctance to take feed for 01 day

- On Admission
- Sick-looking , lethargic , depressed NNR
- Diagnosis
- N.N.Sepsis , LBW IUGR
- Management
- I/V antibiotics , I/V fluids , resuscitation/CPR
- D.O.E 11-04-2009
- Duration of stay in NICU 11 hrs

Thank You
